- b. Interact with others in a manner that promotes respect, confidentiality and dignity
- c. Develop and actively foster an engaged work force, displaying professionalism at all times

2. Safety:

- a. Adheres to Safety Policies, including use of proper Personal Protective Equipment (PPE) and other safety equipment
- b. Reports unsafe conditions immediately to Direct report or member of the Safety team
- c. Reports all incidents, injuries or near misses immediately to Direct report or Safety Advocate
- d. Cooperates in the Early & Safe Return to Work Program if an injury or medical illness requires accommodation

3. Key Responsibilities:

- a. Design, implement and maintain all aspects of Highline’s network environment including routing, switching and wireless.
- b. Design and perform server and security audits, verify system backup procedures, and other recovery processes in accordance with the company’s disaster recovery and business continuity strategies.
- c. Establishes and maintains systems to secure and control deployed technologies.
- d. Monitors for compliance and enforces policies outlining acceptable use of company systems, assets and information resources
- e. Propose and create system design models, specifications, diagrams, and charts to provide end to end transparency of the systems described.
- f. Create and maintain documentation as it relates to system configuration, mapping, processes, and service records.
- g. Conduct research on software and systems to justify recommendations and to support purchasing efforts.
- h. Develop and monitor key performance indicators for the IT systems that reflect on real world impact of these IT systems
- i. Maintains professional and technical knowledge by attending educational workshops; reviewing professional publications; establishing work networks and participating in professional societies.
- j. Achieves work results by establishing priorities, monitoring progress, revising schedules as needed, and resolving problems as they arise.

4. Employee Relations:

- a. Collaborate with other IT associates to ensure smooth and reliable operation of software and systems that fulfilling business objectives and processes.

5. Tools and Equipment:

- a. Ensures the safe operating condition of equipment and reports unsafe or inadequate equipment to the IT Administrator and/or maintenance department and, if necessary, removes it from service.

6. Other Duties:

- a. Works closely with all departments and farms to resolve IT issues
- b. Participate in training as required
- c. Participates in weekly IT meeting and other meetings as required
